

PERSONAL PROFILE

Dr. Ed Lin is one of two partners at Orthodontic Specialists of Green Bay (OSGB), a private practice in Green Bay, Wisconsin. He is also one of two partners at Apple Creek Orthodontics of Appleton (ACOA). Dr. Lin received both his dental (DDS) and orthodontic (MS) degrees from Northwestern University Dental School. OSGB and ACOA are both completely digital practices and have been utilizing SureSmile since February of 2004 at four different practice locations. Both practices have been involved with cone beam computer tomography (CBCT) with the iCAT since 2006. Dr. Lin converted his practice to a 100% SureSmile practice in February of 2007.

Dr. Lin helped to lead tests of cone-beam applications for integration with creating the SureSmile wires for active therapeutic treatment of patients. Dr Lin will discuss the invaluable asset of CBCT in diagnosing and treatment planning in dentistry. He will also review several orthodontic cases utilizing the integration of iCAT with SureSmile with a focus on inter-disciplinary care. Dr Lin is an internationally recognized speaker (US, Canada, Puerto Rico, Australia, and China), has written several articles that have been published in a wide variety of dental journals, and has lectured at several orthodontic residency programs across the United States. He is also a Faculty and Clinical Advisory Board Member for SureSmile and is on the Editorial Board of OrthoTown and Orthodontic Practice journals.

EDUCATION

Northwestern University Dental School - DDS
Northwestern University Dental School - MS
University of Chicago - BA 1985
