Clear Beautiful Braces

A confident smile for an active lifestyle

Your smile helps project your image, and a beautiful, healthy smile radiates confidence. The same should be true when wearing braces. Instead of going through treatment with visible metal braces, invest in Radiance Plus - the clearest braces available.

Radiance Plus braces are the ultimate combination of beauty, performance, and strength, allowing you to live life to the fullest while your teeth are being straightened. Whether you're at work or at play, Radiance Plus effectively works to deliver your ideal smile with no interruption to your treatment or active lifestyle.

Scan here to listen to a patient discuss her decision to get Radiance Plus.

Why Radiance Plus?

Beauty

- Unlike metal braces, Radiance Plus braces are clear and beautiful on your teeth. They are made from pure grown sapphire and are proven to be the clearest cosmetic braces in the orthodontic industry.¹
- Radiance Plus braces resist staining and stay brilliant throughout treatment.

Performance

- Radiance Plus braces are designed to effectively treat nearly every type of orthodontic case, whereas other clear appliances are only designed to work with the least complicated cases.
- The smooth, contoured design makes Radiance Plus easier to keep clean, helping maintain proper hygiene throughout treatment.

Strength

- Sapphire is the second strongest material in nature, making Radiance Plus extremely durable compared to other aesthetic braces.
- The patented Quad-Matte™ base keeps Radiance Plus on your teeth with unparalleled strength, helping reduce the chance of emergency visits.
